Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claims is the combination of the limitations including periodically reporting the outbound gateway resource's availability to the associated resource management gatekeeper; performing alternate routing by selecting one of the routes and sending a resource request to the resource management gatekeeper corresponding to the selected route to initiate the call through an outbound gateway; and the selected gateway resource management gatekeeper determines the an available outbound gateway resource for call setup requests after initialization, as supported on page 4, line 30 to page 6, line 3 and Figures 2 and 3 of the Applicant's specification. These limitations are found in all independent claims. And, the previously mentioned limitations are not found in the prior art references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
